Energizer Button/Coin Battery Consumer Packaging Compliance to Australia ACCC Safety Standards

1. Compliance to Australia Consumer Goods (Button/Coin Batteries) Safety Standard 2020

In compliance to this standard dated 18 December 2020, authorized version F2020L01658, the primary packaging of Energizer Lithium Coin batteries intended for consumer purchase is designed to meet or exceed the referenced requirements of national and international regulations governing access to the packaged batteries by young children. Energizer lithium coin battery consumer packaging has been repeatedly tested to confirm compliance to the following standards:

- European Standard *EN 862:2016-09 Packaging - Child-resistant packing - Requirements and testing procedures for non-reclosable packages for non-pharmaceutical products.*
- International Standard *ISO 28862:2018 - Child-resistant packing - Requirements and testing procedures for non-reclosable packages for non-pharmaceutical products.*
- Australian Standard *AS 5808-2009 Child-resistant packaging—Requirement and testing procedures for non-reclosable packages for non-pharmaceutical products.*
- US Poison Prevention Packaging Standard – *Poison Prevention Packaging Act - 16 C.F.R §§ 1700.15(b) (1) and 1700.20) (a) (2).*

With the exception of Lithium button/coin batteries, Energizer does not market any button/coin batteries applicable to this safety standard. All Energizer non-lithium button/coin batteries have diameters less than 16 mm.

2. Compliance to Australia Consumer Goods (Button/Coin Batteries) Information Standard 2020

In compliance to this standard dated 18 December 2020, authorized version F2020L01659, the primary packaging of Energizer coin/button batteries destined for sale in Australia has been updated as necessary, to carry the required warning statements and internationally recognized safety symbols, incorporating new bar code numbers to facilitate transition of inventory to updated packaging. As of April 1st 2022, all applicable Energizer batteries shipped for distribution in Australia under new bar codes are compliant.
